

How to Crowdcast!

How to Watch a Virtual Event on Crowdcast:

1. You will need either a computer, a smartphone, or a tablet.
2. Crowdcast is a website that you can access with any web browser. You can use Chrome (recommended), Firefox, Safari, Opera, or Edge as your web browser.
3. When you access the Crowdcast link for this event, please enter your email and create a Crowdcast account. That's it. That's all you need to do.
4. Once your account is created, you will be brought to the event's landing page. The timer on the screen shows you when the event is scheduled to begin.
5. Just log in using your email address and password on the date and time specified. You can get there a few minutes early to make sure.

Helpful Tips:

- During the event, you can ask questions in the "Ask A Question" box at the bottom of the screen.
- You can also vote for other questions that you would most like to see answered using the up and down arrows to the left of each question.
- You'll be able to see the author onscreen, but the author, moderator, and Books & Books staff member cannot see you.
